PROFESSIONAL SUMMARY

Senior Product Documentation Leader with 17+ years of experience building and scaling documentation systems for enterprise software.

Expertise across help documentation, API documentation, release workflows, in-app guidance, and knowledge systems aligned with high-velocity product development.

Proven track record of improving product adoption, reducing support dependency, and enabling self-service through structured documentation architecture, governance frameworks, and AI-assisted workflows.

Experienced in working closely with product, engineering, UX, and customer-facing teams to ensure documentation supports real-world usage and integration.

Currently focused on documentation systems, developer experience, and product-aligned content strategy.

EDUCATION

Executive MBA, Product Leadership
2024 - present

Postgraduate in ERP St. Joseph's Evening College
Jan 2007 - Dec 2007

BBA University of Madras

DNIIT
NIIT, Bangalore

EXPERIENCE

- **Present**
- Nordia Infotech | 2026 – Present
- Independent Work | Documentation Systems Case Study (SAP Operations Domain)
- Developed a documentation systems case study in the SAP operations domain based on enterprise workflows observed in environments such as Nordia Infotech
 - Structured fragmented operational knowledge into scalable documentation models to improve clarity, reuse, and system understanding
 - Designed workflow-driven documentation architecture aligned with platform evolution and automation opportunities
 - Translated complex engineering and operations workflows into structured, user-focused documentation
 - Connected documentation systems with product discovery, usability, and platform adoption considerations

SKILLS

- Core Competencies**
- Documentation Expertise
 - Content Strategy & Architecture
 - Team Leadership & Collaboration,
 - Process Optimization & Automation
 - Technical Acumen & Communication
- Soft Skills**
- Communication
 - Collaboration
 - Leadership
 - Problem Solving, Adaptability
 - Time Management, Creativity
 - Attention to Detail
 - Mentorship
 - Process Improvement

INTERESTS

- Biker
- Solo traveler
- Mindfulness enthusiast
- Lifelong learner

■ December 2023 - Present

Zeta

Lead Information Developer

- Owned end-to-end product documentation across API documentation, release notes, knowledge base, and in-app help systems, ensuring alignment with product releases and user workflows
- Managed documentation portal and content organisation, improving searchability, discoverability, and usability
- Delivered documentation for 300+ APIs, improving developer onboarding and integration clarity
- Designed and implemented scalable knowledge base systems with 80+ troubleshooting guides, reducing support tickets by 25% and enabling self-service
- Built release-aligned documentation workflows integrated into agile development cycles, including mandatory documentation checkpoints
- Introduced AI-assisted workflows using ChatGPT to scale documentation production, reducing cycle time by 30–40% and improving consistency
- Established documentation standards, templates, and style guides to ensure consistency and quality across products
- Partnered with product, engineering, UX, and support teams to align documentation with real-world usage and customer needs
- Contributed to in-app help systems, including contextual guidance, tooltips, and onboarding flows to improve user experience
- Designed structured editorial review workflows using AI-assisted prompts to streamline readiness checks
- Led product video scripting and content development for learning and enablement platforms, delivering 15+ explainer and regulatory videos
- Supported documentation platform improvements, including GitHub migration, repository standardisation, and publishing workflows
- Evaluated documentation tools and frameworks, identifying scalability gaps and recommending improvements for long-term maintainability

■ Dec 2021 – Nov 2023

Zeta

Staff Information Developer

- Maintained and shared weekly progress reports, providing stakeholders with updates on documentation tasks, project maturity levels, and stakeholder feedback to ensure transparency and project visibility.
- Content Audit Process: Implemented a 5Cs content audit framework—Correctness, Completeness, Clarity, Consistency, Conciseness—to drive continuous documentation improvement.
- Document Development Lifecycle (DDLC): Co-developed the DDLC for Olympus Academy, bringing structure from draft to publish.
- Information Architecture: Designed a layered structure for the Info-Dev knowledge base based on user personas, document type, and content delivery mode.
- <<Sonali >> Specific to authring
- Explainer Video Production: Drafted and reviewed scripts for internal-facing videos across Olympus Academy and support enablement initiatives.

■ August 2016 - May 2020

Synopsys

Sr Technical Writer

- Mentored a Junior Technical Writer, guiding documentation best practices, reviewing deliverables, and ensuring adherence to deadlines and quality standards.
- Created and maintained comprehensive documentation for a suite of DDR products, including DDR5, DDR4, and LPDDR5 memory technologies, encompassing five product variants.
- Managed the entire documentation lifecycle, ensuring timely updates and delivery of high-quality content for patch releases, bug fixes, and regular product updates.
- Collaborated closely with engineering teams, product managers, and subject matter experts to gather technical information, ensure accuracy, and align documentation with different product versions.
- Tailored content for various end-user personas, including technical users and non-technical audiences, ensuring clarity and accessibility for all stakeholders.

EXPERIENCE

■ August 2015 - July 2016

Libre India

Sr Technical Writer

- Established standardized documentation workflows within Jira, integrating content creation seamlessly into agile development sprints to ensure timely delivery of up-to-date documentation.
- Developed and implemented documentation guidelines to standardize content creation practices across the organization, ensuring consistency and quality from the ground up.
- Created templates for various document types, including functional specifications and patents, working closely with cross-functional teams to understand their specific needs.
- Collaborated with the engineering team to document evolving product features and technical specifications, aligning content updates with the agile development process.

■ April 2013 - July 2015

IP Infusion India

Sr Technical Writer

- Authored a wide range of technical documentation for OcNOS Service Providers, including command reference guides, user manuals, and release notes, focusing on complex networking solutions for service providers.
- Developed and maintained documentation covering essential networking concepts such as Layer 2, Layer 3, and Carrier Ethernet, ensuring technical accuracy and clarity for both internal and external users.
- Created comprehensive documentation for advanced networking features, including Multi-Protocol Label Switching (MPLS), Segment Routing, and Quality of Service (QoS), aiding service providers in effectively configuring and managing their network environments.
- Worked closely with engineering teams to align documentation with the latest product developments, including new technologies such as Streaming Telemetry, Virtual Extensible LAN (VXLAN), and Licensing.

■ September 2007 - July 2010

NetApp India

Information Developer

- Authored a wide range of technical documentation for OcNOS Service Providers, including command reference guides, user manuals, and release notes, focusing on complex networking solutions for service providers.
- Developed and maintained documentation covering essential networking concepts such as Layer 2, Layer 3, and Carrier Ethernet, ensuring technical accuracy and clarity for both internal and external users.
- Created comprehensive documentation for advanced networking features, including Multi-Protocol Label Switching (MPLS), Segment Routing, and Quality of Service (QoS), aiding service providers in effectively configuring and managing their network environments.
- Worked closely with engineering teams to align documentation with the latest product developments, including new technologies such as Streaming Telemetry, Virtual Extensible LAN (VXLAN), and Licensing.

■ March 2006 - March 2007

JPMorgan Chase & Co. Technical Writer

Technical Writer

- Played a key role in designing and developing the first standard template and style guide for GTI technical documents, establishing a foundation for consistency and quality across all documentation.
- Collaborated with subject-matter experts (SMEs), engineers, and managers to create a standardized template for event and procedure documents, streamlining processes and improving clarity across departments.
- Assisted in transitioning documentation workflows and knowledge-sharing practices to the U.S. team, traveling to Chicago to facilitate a smooth and successful implementation.
