

Devika Jallegowda

Documentation Systems Leader

Bengaluru, India | +91 88611 61822 | gdevika423@gmail.com | [linkedin.com/in/devikaj](https://www.linkedin.com/in/devikaj) | productnorth.in

PROFESSIONAL SUMMARY

Documentation systems leader with 15+ years of experience across enterprise SaaS, fintech, semiconductor, and networking software. I lead the writers, standards, and systems that produce documentation at scale, and stay close enough to the craft, from API references to release notes, to set the quality bar and coach writers to hold it independently.

Currently pursuing an Executive MBA in Product Leadership. I embed documentation into the product development lifecycle, track documentation health through structured coverage audits, and champion docs-as-code practices that scale quality without scaling headcount. Editorial judgment is the throughline of my work: sharp enough for API-heavy reference content, and always aimed at the audience rather than the spec.

EXPERIENCE

Independent Documentation Consultant | Nordia Infotech

April 2026 - Present

Bengaluru (Freelance)

- Ran discovery workshops with enterprise architects to identify documentation gaps and define requirements for a centralised knowledge system.
- Wrote a Business Requirements Document and Product Requirements Document with a phased roadmap for automating repetitive consultant workflows.
- Designed a content management approach to consolidate workflow documentation from globally distributed consultants into a single standardised repository.
- Created single-source workflow templates as ready-reckoners for consultants deployed across client sites, reducing duplication and improving access consistency.
- Made the strategic case to senior management for AI-assisted documentation tooling, framing business impact and urgency.

Lead Information Developer | Zeta

December 2023 - May 2025

Bengaluru

Knowledge Base & Documentation Health

- Tracked documentation health by triaging 200+ support tickets to find coverage gaps and stale content, then revamped 40+ troubleshooting guides to close recurring gaps before they became support escalations.
- Built a scalable knowledge base of 80+ troubleshooting guides for support-agent personas, reducing support tickets by 25%.
- Shifted strategy from reactive agent-facing content to proactive self-service by revamping guides for end-user personas.

API Documentation & Developer Experience

- Owned API reference documentation for 300+ endpoints across multiple API domains, working with engineering to define scope, author skeletons, and review writer output at a sustained cadence of 15-20 endpoints per sprint.
- Defined scope and structure for net-new APIs, building initial documentation skeletons and workflow mappings for engineering handoff.

Docs-as-Code & Agile Integration

- Contributed to the team's docs-as-code migration to GitHub, standardising repository structure, branching conventions, and deployment workflows within a CI/CD publishing pipeline.
- Embedded documentation into the product lifecycle by introducing a mandatory documentation checkpoint in the Jira workflow, so docs were scoped, assigned, and reviewed within each sprint rather than after release.
- Drove adoption of agile documentation workflows in sprint cycles, increasing documentation release readiness by 50% and reducing post-release gaps by 40%.

AI-Assisted Editorial Workflow

- Built a two-stage GenAI editorial workflow, stage one for language quality and stage two for structural checks against internal standards, cutting edit cycle time by 30-40%.

- Curated a documentation-specific prompt library tuned to our content standards, so writers could self-review drafts before formal review.
- Documented and shared the prompt set for team-wide adoption, turning an individual practice into a repeatable editorial aid.

Team Leadership & Mentoring

- Led and mentored a team of writers, owning quality standards and coaching them to apply editorial judgment independently, so the bar held across the team's output.
- Directed product video scripting and production for internal programmes, delivering 15+ explainer and regulatory videos with defined tool guidelines and scripting workflows.

Staff Information Developer | Zeta

Bengaluru

December 2021 - November 2023

- Co-developed the Document Development Lifecycle, bringing structure from draft to publish and establishing a repeatable content production model.
- Designed a layered information architecture for the team's knowledge base, structured by user persona, document type, and delivery mode.
- Implemented the 5Cs content audit framework (Correctness, Completeness, Clarity, Consistency, Conciseness) as a team-wide editorial standard.
- Maintained weekly documentation health reports covering maturity levels, backlog, and impact, creating visibility for documentation work inside the product organisation.

EARLIER EXPERIENCE

Synopsys	Senior Technical Writer	Aug 2016 - May 2020
Libre India	Senior Technical Writer	Aug 2015 - Jul 2016
IP Infusion India	Senior Technical Writer	Apr 2013 - Jul 2015
NetApp India	Information Developer	Sep 2007 - Jul 2010
JPMorgan Chase & Co.	Technical Writer	Mar 2006 - Mar 2007
Triumph Research & Holdings	Technical Writer	Mar 2005 - Mar 2006

SKILLS & TOOLS

Documentation	API references, user guides, release notes, troubleshooting guides, knowledge bases, DDLC
Structured Authoring	DITA, topic-based writing, content reuse, single-sourcing, FrameMaker, XMetaL
Docs-as-Code	Git, GitHub, Markdown, Hugo, static site generators, CI/CD publishing pipelines
AI & Automation	GenAI prompt design, ChatGPT editorial workflows, two-stage AI review, GitHub Actions
Content Strategy	Information architecture, content governance, 5Cs audit, documentation health tracking
Agile	Sprint embedding, Jira lifecycle integration, documentation readiness frameworks
Leadership	Team mentoring, editorial coaching, cross-functional stakeholder management
Tools	Jira, Confluence, MadCap Flare (familiar), Oxygen XML (familiar)

EDUCATION

Executive MBA, Product Leadership — in progress	2024 - Present
Postgraduate in ERP — St. Joseph's Evening College	Jan 2007 - Dec 2007
BBA — University of Madras	
DNIIT — NIIT, Bengaluru
